PERMISSIONS

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.INTERNET	dangerous	full Internet access	Allows an application to create network sockets.
android.permission.ACCESS_NETWORK_STATE	normal	view network status	Allows an application to view the status of all networks.
android.permission.WRITE_EXTERNAL_STORAGE	dangerous	read/modify/delete SD card contents	Allows an application to write to the SD card.
de.number26.android.permission.C2D_MESSAGE	signature	Allows cloud to device messaging	Allows the application to receive push notifications.
com.google.android.c2dm.permission.RECEIVE	dangerous	Unknown permission from android reference	Unknown permission from android reference
android.permission.WAKE_LOCK	dangerous	prevent phone from sleeping	Allows an application to prevent the phone from going to sleep.
android.permission.READ_CONTACTS	dangerous	read contact data	Allows an application to read all of the contact (address) data stored on your phone. Malicious applications can use this to send your data to other people.
com.google.android.providers.gsf.permission.READ_GSERVICES	dangerous	Unknown permission from android reference	Unknown permission from android reference
android.permission.ACCESS_COARSE_LOCATION	dangerous	coarse (network-based) location	Access coarse location sources, such as the mobile network database, to determine an approximate phone location, where available. Malicious applications can use this to determine approximately where you are.

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.ACCESS_FINE_LOCATION	dangerous	fine (GPS) location	Access fine location sources, such as the Global Positioning System on the phone, where available. Malicious applications can use this to determine where you are and may consume additional battery power.
android.permission.USE_FINGERPRINT		normal	This constant was deprecated in API level 28. Applications should request USE_BIOMETRIC instead
android.permission.FOREGROUND_SERVICE	normal		Allows a regular application to use
de.number26.android.permission.PUSH_MESSAGE	dangerous	Unknown permission from android reference	Unknown permission from android reference
android.permission.READ_EXTERNAL_STORAGE	dangerous	read SD card contents	Allows an application to read from SD Card.
android.permission.CAMERA	dangerous	take pictures and videos	Allows application to take pictures and videos with the camera. This allows the application to collect images that the camera is seeing at any time.
android.permission.ACCESS_WIFI_STATE	normal	view Wi-Fi status	Allows an application to view the information about the status of Wi-Fi.
android.permission.MODIFY_AUDIO_SETTINGS	dangerous	change your audio settings	Allows application to modify global audio settings, such as volume and routing.
android.permission.RECORD_AUDIO	dangerous	record audio	Allows application to access the audio record path.
com.google.android.finsky.permission.BIND_GET_INSTALL_REFERRER_SERVICE	dangerous	Unknown permission from android reference	Unknown permission from android reference
android.permission.FLASHLIGHT	normal	control flashlight	Allows the application to control the flashlight.
android.permission.BLUETOOTH	dangerous	create Bluetooth connections	Allows an application to view configuration of the local Bluetooth phone and to make and accept connections with paired devices.
android.permission.BLUETOOTH_ADMIN	dangerous	bluetooth administration	Allows an application to configure the local Bluetooth phone and to discover and pair with remote devices.

Manifest Analysis

Issue	Severity	Description
Activity (de.number26.machete.android.deeplink.DeepLinkActivity) is not Protected. An intent-filter exists.	high	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. The presence of intent-filter indicates that the Activity is explicitly exported.

ISSUE	SEVERITY	DESCRIPTION
Activity (de.number26.machete.android.ui.HomeActivity) is not Protected. An intent-filter exists.	high	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. The presence of intent-filter indicates that the Activity is explicitly exported.
Activity (de.number26.machete.android.refactor.presentation.pay.InAppVerificationActivity) is not Protected. An intent-filter exists.	high	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. The presence of intent-filter indicates that the Activity is explicitly exported.
TaskAffinity is set for Activity (de.number26.machete.android.refactor.presentation.chat.ChatWebViewActivity)	high	If taskAffinity is set, then other application could read the Intents sent to Activities belonging to another task. Always use the default setting keeping the affinity as the package name in order to prevent sensitive information inside sent or received Intents from being read by another application.
Broadcast Receiver (com.adjust.sdk.AdjustReferrerReceiver) is not Protected. [android:exported=true]	high	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
Service (de.number26.machete.android.refactor.data.remote_message.reception.FirebaseMessageCapturerService) is not Protected. An intent-filter exists.	high	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. The presence of intent-filter indicates that the Service is explicitly exported.
Service (de.number26.machete.android.refactor.data.remote_message.registration.FirebaseDeviceTokenService) is not Protected. An intent-filter exists.	high	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. The presence of intent-filter indicates that the Service is explicitly exported.
Service (com.google.firebase.messaging.FirebaseMessagingService) is not Protected. [android:exported=true]	high	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
Broadcast Receiver (com.google.android.gms.measurement.AppMeasurementInstallReferrerReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.INSTALL_PACKAGES [android:exported=true]	high	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
Broadcast Receiver (com.google.firebase.iid.FirebaseInstanceIdReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: com.google.android.c2dm.permission.SEND [android:exported=true]	high	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
Service (com.google.firebase.iid.FirebaseInstanceIdService) is not Protected. [android:exported=true]	high	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
Activity (de.idnow.sdk.Activities_VideoLiveStreamActivity_IceLink) is not Protected. [android:exported=true]	high	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
High Intent Priority (900) [android:priority]	medium	By setting an intent priority higher than another intent, the app effectively overrides other requests.

SHA-1 is a weak hash known to have hash collisions. App uses SQLite Database and execute raw SQL query. Untrusted user input in raw SQL queries can cause SQL Injection. Also sensitive information should be encrypted and written to the database. The App uses ECB mode in Cryptographic encryption algorithm. ECB mode is known to be weak as it results in the same ciphertext for identical blocks of plaintext.	high	5.9	CWE-327	com/n26/ac/a/e.java fm/Crypto.java fm/icelink/Crypto.java fm/icelink/IdnowCertificate.java

"fixed_term_education_withholdingtax_when_howmuch_text" : "First Save Euro and Inbank do not withhold taxes. The full amount of interest earnings is paid out to you. It's your responsibility to declare your interest income in your tax returns. For customers tax-liable in Germany, Grenke Bank and Greensill Bank are obliged by German law to withhold the capital gains, solidarity and {{churchtax}}. The bank automatically deducts all applicable taxes from your investment if you are a tax resident of Germany. This means that the interest paid out to you always reflects the net amount after taxes. The withholding tax is roughly up to 28% on your interest earned (may be up to 2% lower in individual cases). You can, however, file a tax exemption form for the tax on capital gains as well as the church tax."
